Revision: 13.11.2018

#### Trade name: PC68 Debonder

(Contd. of page 1) P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

present and easy to do. Continue rinsing.If eye irritation persists: Get medical advice/attention.

*P337+P313* • **2.3 Other hazards** 

2.5 Other nazaras

· Results of PBT and vPvB assessment

• *PBT:* Not applicable.

• **vPvB:** Not applicable.

## SECTION 3: Composition/information on ingredients

· 3.1 Chemical characterisation: Substances

· CAS No. Description

108-32-7 PC68 Debonder

· Identification number(s)

• EC number: 203-572-1

· Index number: 607-194-00-1

· SVHC Not listed as a SVHC at the date of this document

## **SECTION 4: First aid measures**

• 4.1 Description of first aid measures

- General information:
- Do not leave affected persons unattended.
- Seek immediate medical advice.
- After inhalation:

Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist.

In case of unconsciousness place patient stably in side position for transportation.

• After skin contact:

Immediately wash with water and soap and rinse thoroughly. Remove contaminated clothing. Dispose of contaminated clothing as hazardous waste. Observe precautions.

Repeated skin contact may result in irritation and dermatitis. Always wear protective gloves suitable for this product.

• After eye contact:

Rinse opened eye for at least 15 minutes under clean running water. Remove contact lenses if possible. Seek immediate medical advice.

Continue to irrigate the eye with clean water.

Seek immediate medical advice.

• After swallowing:

Do NOT induce vomiting; rinse mouth with water, call for medical help immediately.

Rinse out mouth and then drink plenty of water if patient is fully conscious.

- 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

## **SECTION 5: Firefighting measures**

- 5.1 Extinguishing media
- Suitable extinguishing agents:
- Use fire extinguishing methods suitable to surrounding conditions.

CO2, powder or water spray. Fight larger fires with aqueous film forming foam (AFFF). Cool containers with water spray.

- · For safety reasons unsuitable extinguishing agents: Water with full jet
- $\cdot$  5.2 Special hazards arising from the substance or mixture

Carbon monoxide (CO), if incomplete combustion.

(Contd. on page 3)

Printing date 13.11.2018

Version number 2

Revision: 13.11.2018

Trade name: PC68 Debonder

· 5.3 Advice for firefighters

- *Protective equipment: Respiratory protective device.*
- Additional information

Collect contaminated fire fighting water separately. It must not enter the sewage system.

### **SECTION 6: Accidental release measures**

- 6.1 Personal precautions, protective equipment and emergency procedures Keep people at a distance and stay on the windward side. Wear protective clothing.
- · 6.2 Environmental precautions:

In case of seepage into the ground inform responsible authorities. Do not allow to enter sewers/ surface or ground water.

- 6.3 Methods and material for containment and cleaning up: Send for recovery or disposal in suitable receptacles - may need to be UN approved.
   6.4 Reference to other sections
- See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

### **SECTION 7: Handling and storage**

• 7.1 Precautions for safe handling Take note of emission threshold.

Use only in well ventilated areas.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

- Information about fire and explosion protection: No special measures required.
- · 7.2 Conditions for safe storage, including any incompatibilities

• Storage:

· Requirements to be met by storerooms and receptacles:

Provide solvent resistant, sealed floor.

Prevent any seepage into the ground.

Use only receptacles specifically permitted for this substance/product.

Unsuitable material for receptacle: aluminium.

• Information about storage in one common storage facility: Not required.

• Further information about storage conditions: Keep container tightly sealed.

• 7.3 Specific end use(s) No further relevant information available.

## SECTION 8: Exposure controls/personal protection

• Additional information about design of technical facilities: No further data; see item 7.

- · 8.1 Control parameters
- Ingredients with limit values that require monitoring at the workplace: Not required.
- Additional information: The lists valid during the making were used as basis.
- · 8.2 Exposure controls
- · Personal protective equipment:
- General protective and hygienic measures:
- Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work.

Avoid contact with the eyes.

Avoid contact with the eyes and skin.

Avoid alcohol consumption while working with the product.

(Contd. on page 4)

(Contd. of page 2)

Version number 2

Revision: 13.11.2018

(Contd. of page 3)

#### Trade name: PC68 Debonder

• *Respiratory protection:* 

*Use suitable respiratory protective device in case of insufficient ventilation - when exposure levels are likely to be exceeded.* 

• Protection of hands:

Solvent resistant gloves. Use gloves approved to BS EN 374 : Protective Gloves against Chemicals. Chemical Resistant Gloves, class 4 or higher for prolonged exposure.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Durability and suitability of glove material is usage dependent. We recommend advice from an experienced glove supplier.

Alway wear gloves with clean hands. Contaminated gloves should always be replaced.

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.

Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed. Ideally a breakthrough time of >480 minutes is recommended, but >240 minutes should be viewed as minimum for continuous contact.

• Eye protection:

Tightly sealed goggles or equivalent eyewear. Approved to EN166 Standard.

#### · Body protection:

Protective work clothing, ideally with anti-static properties - especially if a DSEAR risk assessment warrants this type of clothing.

SECTION 9: Physical and ch	emical properties
9.1 Information on basic physical a General Information Appearance:	nd chemical properties
Form:	Liquid
Colour:	Colourless (Aged product may darken depending upon storage
• Odour: • Odour threshold:	conditions and time period) Mild Not determined.
· pH-value:	Not determined.
• Change in condition Melting point/freezing point: Initial boiling point and boiling re	-54 °C ange: 242 °C
· Flash point:	135 °C
· Flammability (solid, gas):	Not applicable.
· Ignition temperature:	430 °C
· Decomposition temperature:	Not determined.
• Auto-ignition temperature:	Not determined.
· Explosive properties:	Product does not present an explosion hazard.
· Explosion limits: Lower:	1.9 Vol %
	(Contd. on page 5

		(Contd. of page 4)
Upper:	Not determined.	
· Vapour pressure at 20 °C:	0.04 hPa	
· Density at 20 °C:	1.205 g/cm <sup>3</sup>	
· Relative density	Not determined.	
· Vapour density	Not determined.	
· Evaporation rate	Not applicable.	
· Solubility in / Miscibility with		
water:	Not determined.	
· Partition coefficient: n-octanol/water:	Not determined.	
· Viscosity:		
Dynamic:	Not determined.	
Kinematic:	Not determined.	
• 9.2 Other information	No further relevant information available.	

## **SECTION 10: Stability and reactivity**

· 10.1 Reactivity No further relevant information available.

- · 10.2 Chemical stability
- · Thermal decomposition / conditions to be avoided:

No decomposition if used according to specifications and industry good practice.

- 10.3 Possibility of hazardous reactions No dangerous reactions known.
- 10.4 Conditions to avoid No further relevant information available.
- 10.5 Incompatible materials: Acids, strong oxidising agents, strong alkalis.
- 10.6 Hazardous decomposition products:
- Carbon monoxide if incomplete combustion.

at high temperatures may decompose to proylene oxide and CO2 causing higher pressure if not properly vented.

# SECTION 11: Toxicological information

· 11.1 Information on toxicological effects

• Acute toxicity Based on available data, the classification criteria are not met.

#### · LD/LC50 values relevant for classification:

Oral LD50 29000 mg/kg (rat)

· Primary irritant effect:

· Skin corrosion/irritation

Prolonged contact with any solvent can result in skin irritation, not classed as an irritant. Always wear suitable gloves when handling.

· Serious eye damage/irritation

Causes serious eye irritation.

- · Respiratory or skin sensitisation Based on available data, the classification criteria are not met.
- · CMR effects (carcinogenity, mutagenicity and toxicity for reproduction)
- · Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- *Reproductive toxicity Based on available data, the classification criteria are not met.*
- · STOT-single exposure Based on available data, the classification criteria are not met.
- STOT-repeated exposure Based on available data, the classification criteria are not met.
- · Aspiration hazard Based on available data, the classification criteria are not met.

### **SECTION 12: Ecological information**

- · 12.1 Toxicity
- · Aquatic toxicity: No further relevant information available.
- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential No further relevant information available.
- 12.4 Mobility in soil No further relevant information available.
- Additional ecological information:
- · General notes:

Water hazard class 1 (German Regulation) (Assessment by list): slightly hazardous for water Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

- 12.5 Results of PBT and vPvB assessment
- *PBT*: Not applicable.
- · vPvB: Not applicable.

· 12.6 Other adverse effects No further relevant information available.

#### **SECTION 13: Disposal considerations**

· 13.1 Waste treatment methods

· Recommendation

Must not be disposed together with household refuse. Do not allow product to reach sewage system. Refer to the revised Waste Framework Directive (2008/98 EC) and the European Waste Catalogue (EWC). Substance is "hazardous" if it is classified as waste according to annexx III of rWFD, subject to thresholds. Refer to "WM3: Hazardous Waste: Interpretation of the definition and classification of hazardous waste", located on Environment Agency website.

• European waste catalogue Refer to WM3 Hazardous Waste: Interpretation of the definition and classification of hazardous waste.

· Uncleaned packaging:

#### · Recommendation:

Waste Solvent Disposal must be made according to official regulations. Refer to Hazardous Waste Regulations 2005. Requires movement under Consignment note by licensed waste carrier. We may be able provide this service - please contact us for more details.

Empty contaminated packagings thoroughly. They may be recycled after thorough and proper cleaning. Please contact us if you wish to return your used packaging (205litre and IBC's only).

Containers to be scrapped as waste must be cleaned so that no hazardous substances remain, otherwise uncleaned containers containing residue for srap will need to be consigned as hazardous waste as per WM3.
