

Technical Information

D2 PVA Wood Adhesive

D2 PVA Wood Adhesive is a high quality PVA polymer emulsion-based adhesive, for general assembly wood working applications, where bonds to BS4071 and BS5270: Part1: 1989, or EN204 D1 & D2 are required. This product exhibits very good adhesion to both soft & hardwoods and other porous materials such as papers and boards.

Properties:

| | |
|-------------------------|--------------------------------------------|
| Base: | PVA emulsion adhesive |
| Stabiliser: | Polyvinyl Alcohol |
| pH: | 4.5– 5.5 |
| Specific Gravity @ 25°C | 1.07 |
| Viscosity @ 23°C | 120 - 200 poise (Brookfield RVF spindle 6) |
| Solid Contents | 40% |
| Storage: | 12 months in original unopened containers |
| Colour: | White liquid. |
